

Project-Helix — Software Requirements Specification (SRS)

Student: Shaik Yusuf John (25B11CS893) | Aditya University

1. System Scope & Objectives

Project-Helix manages the complete startup venture lifecycle across 9 core modules: User Management, Startup Registration, Team Allocation, Job Recruitment, Project Milestones, Task Backlog, Funding Rounds, Investor Directory, and Investment Ledgers.

2. Functional Modules (9 Entities)

1. **USERS:** Authentication, password hashing, role-based access.
2. **STARTUPS:** Venture registration, industry classification, lifecycle status.
3. **TEAM_MEMBERS:** Member roles, allocation dates, M:N resolution.
4. **JOBS:** Startup vacancy postings and recruitment status.
5. **PROJECTS:** Milestone planning and schedule tracking.
6. **TASKS:** Work breakdown structure, priorities, assignee status.
7. **FUNDING_ROUNDS:** Seed/Series capital rounds with target amounts.
8. **INVESTORS:** Accredited venture capital firm profiles.
9. **INVESTMENTS:** Capital tickets and equity participation.

3. Database Integrity & Constraints

- Referential integrity enforced via foreign keys with CASCADE and SET NULL rules.
- Domain checks on status, priority, and positive monetary figures.
- B-Tree indexing on all foreign keys to optimize multi-table JOIN performance.
